eMACC Time Management System Enhancements Summary - October 2022

Pay Differential Codes available with TMS Time Clock

Pay Differential codes are added to the regular pay for the employee when selected during the labor entry process in Accounting Master. Pay differentials may include on-call, weekend pay, swing shift, graveyard shift, etc. MACC recently added the Wage Differential field for selection of Pay Differential Codes during labor entry in TMS. To take this option one step further, the Pay Differential option will now be available when using the Time Clock feature.
