

# MACC's Credit Card Processing

Processing credit cards has never been easier or more secure. MACC customers are able to process and verify credit card payments in cooperation with a third party payment processor.

MACC has teamed with several partners to offer convenient and secure online credit card payment processing with full PCI-compliance. The system is simple to use and economical to deploy. Our partnerships allow us to offer an accurate, flexible billing solution supporting leading-edge service delivery and technology.

## Credit card processing options

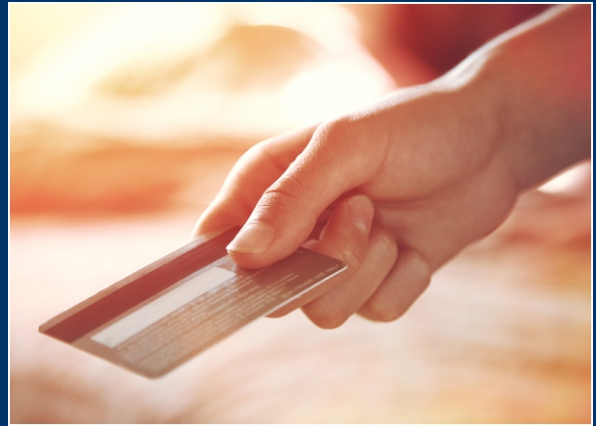

Credit cards can be verified and processed using any of the following options:

- ❑ **Automated** - Recurring payments via Customer Master's Credit and A/R system
- ❑ **Manual** - Payments entered directly into Customer Master
- ❑ **Online** - One-time or recurring payments made via MACC's eBill system or secured cardswipe for walk-in payments

## System requirements

It's likely you already have the basic workstations needed for processing.

## Key Benefits

- ❑ Processing for Visa, MasterCard, American Express, and Discover
- ❑ Multiple direct payment processor options
- ❑ High-level of security with full PCI-compliance
- ❑ Minimal start-up costs
- ❑ Real-time reports
- ❑ Real-time authorization and payment processing

You will need a connection to the Internet via a modern web browser, such as Microsoft Edge. MACC will provide modifications to your Customer Master server and individual workstations.

**Please note:** To use this service, a signed proposal with MACC and a signed contract with one of our payment processing partners must be in place. Use of the credit card processing system is optional and includes a fee.

For more information on MACC's credit card processing, contact your Client Relations Manager or Account Manager.
