

# AccessMart

AccessMart, part of our eMACC suite of web-based services, is an advanced access usage and revenue assurance tool that's fast, easy, and accessible anytime from anywhere.

AccessMart is MACC's web-based revenue assurance and reporting tool. This innovative service allows telecom companies to easily track CABS usage and revenue trends via an online portal. Both short-term and long-term trends can be analyzed to ensure your company receives the carrier access revenue it's due. This service makes the manual record keeping of CABS data unnecessary and frees up staff time for other objectives.

## Standard Reports

AccessMart features four types of standard reports which can be easily exported to Excel spreadsheets or maintained online. These reports can be based on all or individual carriers, exchanges, traffic types, feature groups, or jurisdictions. Here are descriptions of each of the standard reports:

**Revenue and usage reports:** These reports present a single, one-line total amount for access revenue,

## AccessMart's Benefits

- ❑ Your company can easily track, monitor, and report on CABS revenue and usage based on a wide variety of criteria.
- ❑ Manual spreadsheet reports that used to take hours, and even days to prepare, are now just a mouse click away.
- ❑ No extensive training or user manual is required. Just login and select your report options. It is that simple!
- ❑ As it is a MACC product, it features a high level of data security.
- ❑ Online use of AccessMart is available at no additional cost for all of MACC's CABS customers.

as well as access minutes of use (MOUs), and messages for the selected report format.

**CABS invoice recap reports:** These reports present the revenue and charge details from CABS invoices. Access charges, Billing & Collection charges, and PARS Revenues are included in these reports.

**PARS reports:** These reports present the Purchase of Accounts Receivable (PARS) revenues and messages that are included on the CABS invoices.

**B & C charges reports:** These reports present the Billing and Collection Charges, messages, and bill counts that are included on the CABS invoices.

## Report templates

AccessMart allows users to easily create customized reports. They can select criteria to meet their company's needs and then save the settings and a user-defined report name as a template for future use. These customized reports can then be run each month as easily as standard reports.
