

Opportunities are at your fingertips with Customer Master

Customer Master, our industry-leading BSS/OSS, has the proven power you need to manage customers for multiple services in a variety of configurations--all on a stable platform built on solid technology for today's independent service provider.

You Sell It - We'll Bill It

For all the services you provide, Customer Master provides a solution. Customer Master supports multi-customer, multi-service, multi-line profiles in a truly convergent billing environment. What's more, Customer Master features complete support for provisioning of telephone, Internet, and video and cellular services. Our growing list of supported processes and data input/output options includes:

- Easily create and bill for service bundles
- Sell and invoice non-traditional services, including service agreements
- Support for top pay-per-view providers
- E-911 support and output to regional providers
- Integration with top publishers and DA providers
- Full carrier and calling plan support
- Integrated plant management with CAD mapping
- Online bill payment options with MACC's eBill
- ACH and credit card payment processing
- Credit bureau reporting interface
- Remote access available via MACC Mobile

An Integrated, Tailored Solution

MACC's Customer Master provides everything you need to run your business, from Service Orders to Receivables to Reports. But the best part is that you decide its role, choosing from a wide array of integrated functional modules and service support. You control the data with integrated database security options, user-managed database operations, and available online reporting and toll viewing options. Even multiple billing options, billing media, bill printing and fulfillment are among the variables at your control.

Do you want to let MACC process the bills, but print them yourself? Not a problem. Want to install Customer Master across your multi-city, multi-office network, and integrate it with our Accounting Master Part 32-compliant accounting system— or even your own accounting system? MACC can handle it!

An ASP Version is also available

If you are interested in an Application Service Provider (ASP) version of Customer Master, you'll be happy to know it's available. It features all of the powerful capabilities of Customer Master with no up-front hardware purchase, flexible monthly payment options, and our expert conversion and implementation team.
